

## Developer (m/f/d)

# Electrical Engineer / Automation Technology

VELOMAT Messtelektronik GmbH, based in Kamenz, is a medium-sized company. For over 30 years, we have been the go-to experts for specialist enquiries relating to measurement electronics and sensor technology. We supply both domestic and international customers and also offer bespoke solutions, which we are able to deliver from prototype to series production thanks to our in-house development and manufacturing capabilities.

### Your responsibilities

- Development and design of innovative automation concepts for the production of sensors and measurement electronics
- Analysis of technical requirements and assessment of the feasibility of planned automation solutions
- Planning and implementation of automation and control systems through the analysis of production and testing processes
- Commissioning of new plant and systems, including functional testing, system optimisation and ensuring reliable plant operation
- Analysis of faults and continuous improvement of processes and automation solutions in terms of efficiency, quality and energy consumption
- Assistance with user training and technical support for modifications, upgrades and operational queries

### Your expertise

- A degree in Electrical Engineering or Automation Engineering;
- In-depth knowledge of measurement technology, standard methods for determining physical quantities, and various MS Office programmes;
- Proficiency in the use of CAD systems for the design of electronic and mechanical assemblies
- Programming skills in C and C++ for embedded systems or microcontrollers
- Fluency in spoken and written English
- Good analytical and conceptual skills, as well as a strong customer focus

### Benefits

- A varied role and thorough induction
- Responsibility and interesting tasks
- Opportunities for professional and personal development
- Permanent contract of employment
- Competitive salary
- Company pension scheme
